Having completed my studies and research at Columbia University in the City of New York, I have taken a short/ seasonal sabbatical in Ludlow Vermont as a ski instructor for my own mind and fitness. I expect to return to work in finance in the New Year and look forward to speaking with you about the opportunity I recently discovered on your Corporate web page.

In addition to the accompanying Resume/CV and as a key part of my application at your firm I have included a cover-page which outlines some of my experiences and traits which have led to the roles and success throughout my career. I am currently a part-time graduate student at the Harvard Kennedy School of Public Policy however the institution has granted me six years to complete my studies and the courses are mostly remote. I hope to complete the program in the evenings where time affords me to do so. I have ten years of experience working with various hedge funds as well as sell-side institutions as a trader, credit analyst, and portfolio manager. Having recently completed my studies and research as a student at Columbia University in the City of New York I recently decided to take a short sabbatical in Vermont as a ski-instructor to better my fitness and mind – I hope to return to work in the New Year.
